

VOLTRON COATING SOLUTIONS

Corrosion Protection, Powered by Process Intelligence

www.voltroncoat.com

The Critical Need for Process Visibility

The problem is not just coating.
It is **Process Visibility**.

Repeatable DFT, bath control, and oven validation.

Traceability: Audit-ready documents and ESG records.
records.

Dispatch discipline and quality governance.

Voltron is built to answer these through systems, not assumptions.

Voltron Positioning & Strategy

A process-controlled ED/CED coating partner

Target Sectors

High-precision requirements:

Automotive Components

Industrial Machinery

High-Reliability Parts

Core Pillars

Built on technical excellence:

ERP Traceability

PLC/HMI Control

Quality Governance

Strategic Focus

Beyond simple coating:

ESG Operations

Customer Documentation

Process Engineering

Advanced Plant Infrastructure

12-Tank ED/CED Coating Infrastructure

Full Pretreatment & CED Bath Systems

UF Recovery & Anode Cell Technology

PLC/HMI Automation & Modbus Metering

Technical Specifications

- Rectifier: **350A × 250V** Precision Control
- Integrated **Baking Oven** & DM Plant
- On-site **ETP** for Environmental Compliance
- Real-time **Energy Monitoring** Stack

Voltron Operating System (VOS)

The digital brain behind the coating plant

END-TO-END CONNECTIVITY

VOS connects every stage of the lifecycle: RFQ → Feasibility → Lot Tracking → Rack Tracking → Inspection → Dispatch.

INTEGRATED GOVERNANCE

Built-in modules for PPAP, NCR/CAPA, maintenance, and EHS, ensuring the plant is always audit-ready.

REAL-TIME INTELLIGENCE

Continuous monitoring of ED parameters, bath trends, and process deviations to ensure absolute repeatability.

ERP-ENABLED OPERATIONS

Seamless integration with Odoo ERP for cost/kg analysis, inventory management, and automated reporting.

ERP-Enabled. Process-Controlled. Audit-Ready.

ERP-Enabled Traceability

Every lot tells a complete story

Customer → DC / Part → Lot / Rack → Process → Inspection → Dispatch → Invoice

Granular Data Capture: Tracks shift, operator, DFT, rework, and rejection status for every single rack.

Audit-Ready: Seamless integration between production records and records and financial invoicing for full transparency.

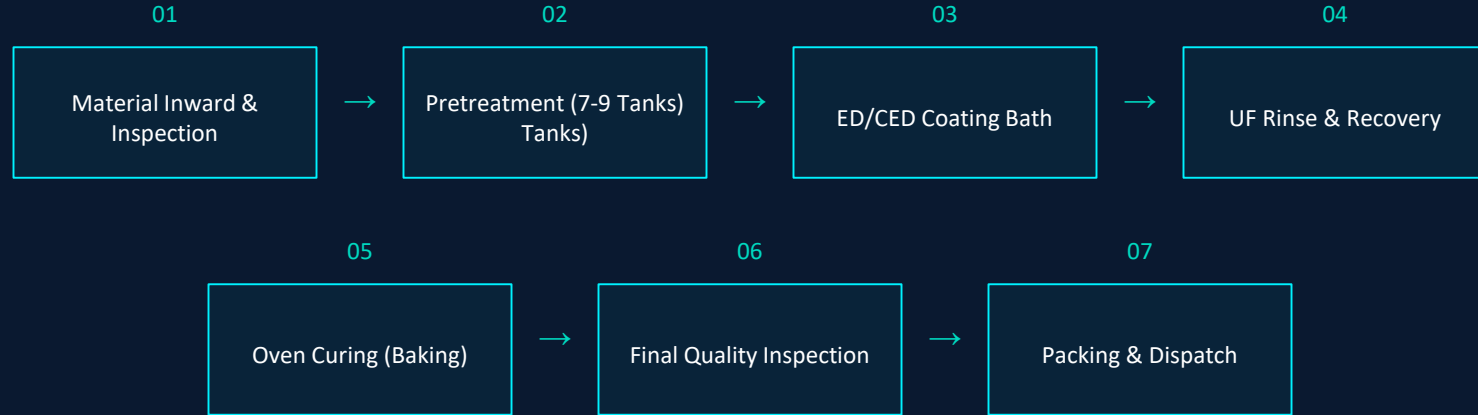

Process Intelligence Stack

Layered control for reliable, audit-ready coating operations

The ED/CED Process Flow

Each stage is linked to real-time process records and quality governance.

Quality Governance Framework

Systems designed for absolute repeatability

CORE STANDARDS

APQP

PFMEA

Process Flow

Control Plan

PPAP

MSA

MONITORING & CONTROL

SPC

Cpk Monitoring

Calibration

Master Samples

NCR / CAPA

8D Analysis

Continuous quality monitoring ensures every lot meets rigorous customer specifications.

Intelligent Dashboards & Roadmap

CEO Dashboard

- Revenue & Receivables
- Cost/kg Analysis
- Plant Profitability
- Capacity Utilization

CTO Dashboard

- DFT & Bath Trends
- PPAP Status
- NCR / CAPA Tracking
- Process Deviations

Operations Dashboard

- Production & WIP
- Dispatch Status
- Downtime & Maintenance
- ETP Parameters

TECHNOLOGY ROADMAP

SCADA Integration

Predictive Maintenance

AI-Assisted Visual Inspection

Industry 4.0 Maturity

ESG & Risk Discipline

OPERATIONAL ESG

Environmental

UF recovery, ETP systems, water recycling, and energy efficiency.

Social

Rigorous PPE standards, safety training, and chemical handling protocols.

Governance

Document control, multi-level approvals, and audit compliance.

RISK MITIGATION

Process Stability

Tracking bath instability and oven variation risks.

Operational Continuity

Managing rejection rates, ETP health, and supplier risks.

Financial Integrity

Real-time monitoring of cost/kg and resource utilization.

Leadership & Contact Information

Rajendra

CO-FOUNDER & CEO

Expertise in manufacturing, finance, execution, and business operations. Driving the strategic growth and operational excellence of Voltron.

Omkar

CO-FOUNDER & CTO

IIT Madras B.Tech + M.Tech. Specialist in Intelligent Manufacturing and Industry 4.0. R&D experience at Tata Motors and Philips.
